

## Titration function

Titration makes it possible to change target concentration during operation without stopping the pump, guaranteeing continuous infusion and blood drug concentration

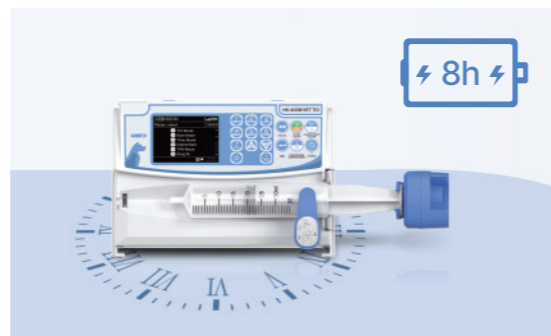

## Great compatibility of syringes

Automatically identifies various syringe types and sizes from 2ml to 60ml

## Long-lasting battery

The battery life is long-lasting enough to last up to 8 hours at 5ml/h. The long run battery is designed to continue through major operations as well as extended post-operative sedation and analgesia infusion

# HK-400III VET TCI

Professional Veterinary Anesthesia Pump

# Professional performance made ease

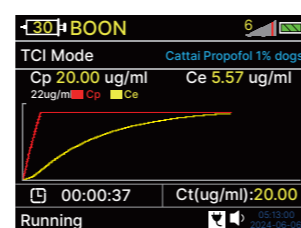

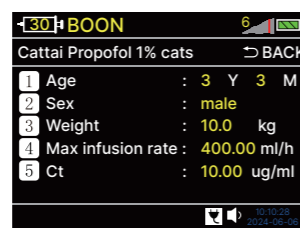

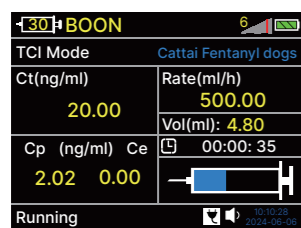

An innovation from Hawkmed that provides anesthesia for animals in a completely portable device. Cooperated with experienced well-known doctors, HK-400III VET TCI assures veterinarians of accurate and powerful anesthesia functions while providing animals with easier and safer treatment.

## TCI - Target Controlled Infusion

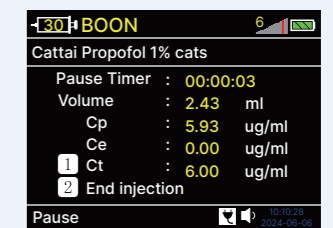

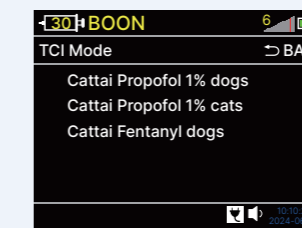

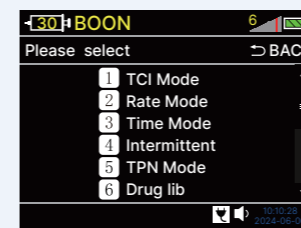

The HK-400III VET TCI is dedicated for animal anesthesia with pharmacokinetics (PK) model.

Drug Name	PK Model	Drug Concentration	Target	Animal
Propofol	Cattai	1%	Plasma	dog
Propofol	Cattai	1%	Plasma	cat
Fentanyl	Cattai	/	Plasma	dog

## Easy, intuitive interface

Ensures accurate and fast operations

## High level waterproof

Advanced moisture protection (IP44) for cleaning and disinfection results in optimized stability and fewer repair costs

## Excellent Accuracy

High accuracy is achieved within  $\pm 2\%$  when flow rate is as low as 0.1 mL/h

Injection accuracy

**$\pm 2\%$**
