MEDICAL CABINET SYSTEM

The cabinetry is like furniture in animal hospitals. Clinics and all the practices. It does not merely provide working platforms for preparation, cleaning, scrubbing, etc, also brings great storage space and make all the tools and materials organized.

- The base cabinets off the ground will facilitate the cleaning jobs.
- Bottom cabinets sitting on ground, overhead cabinets and tall cabinetry.
- A vast selection of all the wood colours and textures.
- Many patterns available for the regular opening doors on both overhead and floor standing cabinets.
- All the colours, sizes, accessories, combinations can be tailor made.
- Free of charge 3D designing software.

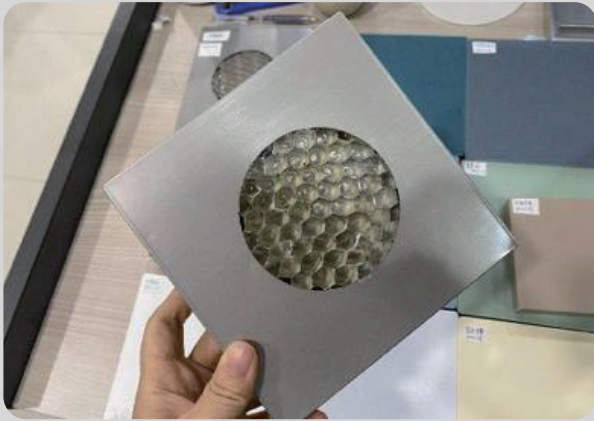

ADVANTAGES OF STAINLESS STEEL

- Easy to clean and no maintenance worry.
- High-end appearance, professional benchmarking hospital style.
- Compared with wooden cabinets, stainless steel will not mold, will not be damp, will not give rise to insects.
- Long service life and durability.
