Vision

An enterprise to be accomplished by people of empathy, who are striving to make the world healthier

Credo

In perfection we believe

Strategy

Catch up via differentiation

DISPOSABLE ENDOSCOPIC LINEAR CUTTER STAPLER AND RELOADS

Applications

Applicable for resection, transection and anastomosis of lung, bronchial tissue, stomach and intestine in open or endoscopic surgery.

B-shape Staple

Product Advantages

01 Curved tip

Not only provides better visualization to ensure the safety of resection and anastomosis of blood vessels, but also allows blunt dissection of tissues or organs.

02 “Droplets” nail groove

Optimize B-shape staple formation and delivers superior hemostasis and pressure resistance.

03 Unibody anvil

Render bite force adequate and complete compression.

04 Three-row unequal height stitching design

Progressive clamping of the tissue to ensure staple formation, facilitate lateral drainage of tissue fluid, easier compression to the right height, ensure staple formation, provide wider adaptability of tissue thickness, tissue healing, better closure and haemostasis.

05 Single-hand operation

Make reloads to easily clamp and release, free up surgeons' hands.

06 Rotating system

The marble-type rotary nob delivers more smooth, stable and easy rotation, and the large wave-shaped knob for easy one-handed operation.

07 Different specifications

The gun has 3 models total, and is compatible with reloads of all specifications, which also include different models according to their colors and heights, helping to deliver superior performance according to a range of thickness.

DISPOSABLE SKIN STAPLER

APPLICABLE DEPARTMENT

- Oncology
- Cardiothoracic surgery
- Burns
- orthopedics
- Emergency Department
- neurosurgery

Applications

Applicable to the closure of surgical and traumatic wounds (straight and roughly straight shapes)

Product Advantages

- 01** Simple to use
Provide simple operation, lightening the burden on surgeons.
- 02** Fast suture
Eases patients' pains and improves operation efficiency.
- 03** Quick recovery
Minimizes the incision scar and postoperative recovery time.

Stapler

- 01** Evert and approach skin incisions.
- 02** Release trigger to achieve the suturing.
- 03** Place stapler on the center of everted skin incisions and squeeze the trigger completely.

Remover

01 Insert the front part of the remover under suture nails, and slide the nails into the notch in the lower jaw.

- 02** Hold the handle of remover before the upper and lower side of handle are in place.
- 03** Confirm the suture nails deformed and separated from the skin, and remove the nails.

DISPOSABLE CIRCULAR STAPLER

Applications

Applicable to end to end, end to side, side to side anastomosis in digestive tract reconstructive surgery of esophagus, stomach and intestines.

Product Advantages

- 01** Minimum suture gap
Prevent tissue been crushed.
- 02** Four-axis positioning nail
Ensure precise staple formation.
- 03** Material
Titanium staple provides tensile strength to ensure steady anastomosis after surgery.
- 04** Ring-shape blade
Made through special process and cut sharply.
- 05** Indicator window
Provide real-time position of nail.
- 06** B-shape staple
Reduce the risk of postoperative bleeding.

Order Information

DISPOSABLE HEMORRHOID STAPLER

Applications

Applicable for selective resection and suturing of dentate line mucos.

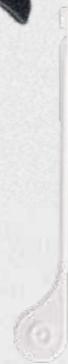

stitch piece

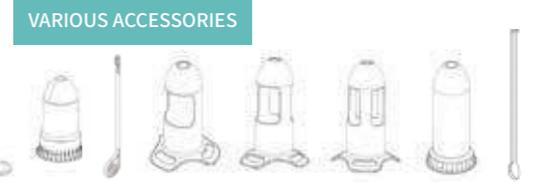

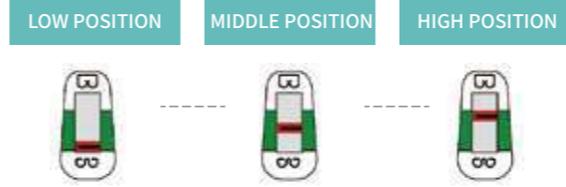

anorectal piece

enlargement

hook part

Product Advantages

- 01** Minimum suture gap
Prevent tissue been crushed.
- 02** Ring-shape blade
Made through special process and cut sharply.
- 03** Indicator window
Provide real-time position of nail.
- 04** Larger cartridge
Provide large scope for more tissue.
- 05** B-shape staple
Reduce the risk of postoperative bleeding.
- 06** Reloads
A broad range of specifications meet various surgical requirements.

DISPOSABLE RELOADABLE LINEAR CUTTER STAPLER AND RELOADS

Applications

To use in creation of anastomotic site or closure of incision in recreation surgeries of digestive tract or other resection procedures.

Applicable departments

General surgery , thoracic surgery ,hepatobiliary surgery.

Product Advantages

01 Anvil

Anvil with high strength meets more challenging surgical requirements.

02 Length

The length of stapled line is 1.5 times of that of staple, preventing the risk of bleeding.

03 Convenience

Combination between manual and automatic operation along with corresponding sounds.

04 Reloadable

Reloadable design allows 5 replacements of reloads during one surgery, thus reducing costs.

DISPOSABLE LINEAR STAPLER

Applications

To suture incision or open end in digestive tract recreation surgery or viscera resection.

Applicable departments

Applicable for gastrointestinal surgery.

Product Advantages

- 01** B-shape Staple
Reduce the risk of postoperative bleeding.
- 02** Narrower design
Reduce the risk of causing damage to peripheral tissue in surgery.
- 03** Reset button
Make operation easy and efficient.
- 04** Reloads
with a broad range of models meet various surgical requirements.
- 05** Convenience
Combination between manual and automatic operation along with corresponding sounds.

DISPOSABLE TROCAR

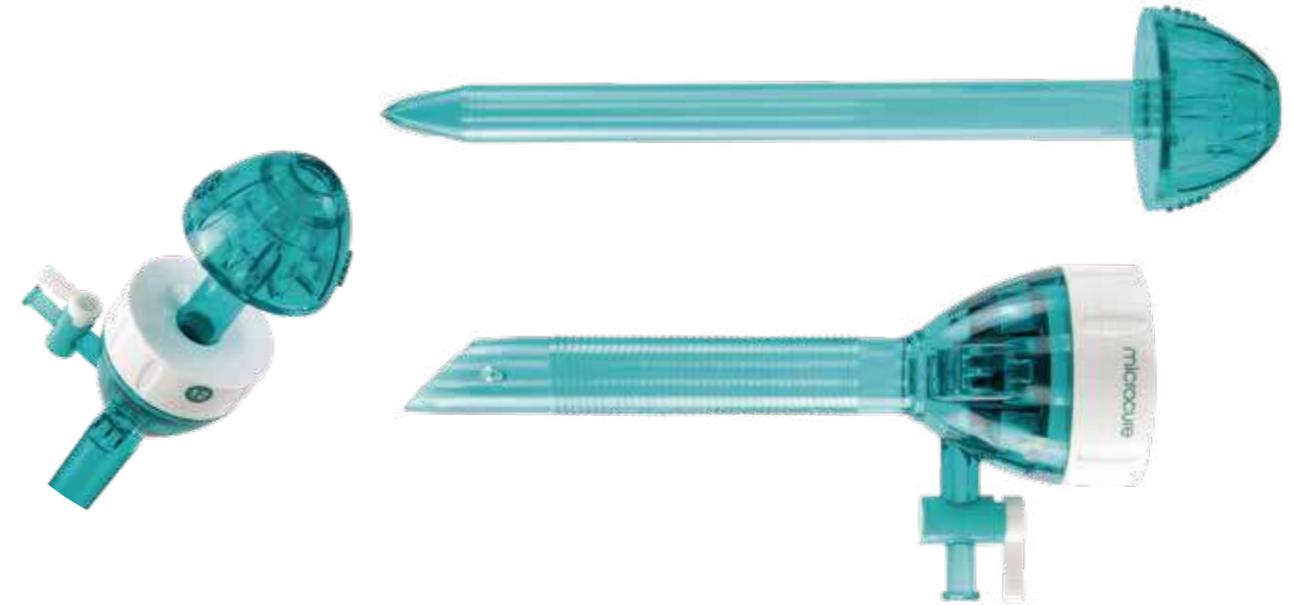

Applications

Applicable to the establishment of microports for introduction of endoscopes and laparoscopic instruments.

Product Description

Applicable to the establishment of microports for introduction of endoscopes and laparoscopic instruments.

Product Advantages

01 Visible puncture

With transparent puncture rob tip, camera can be placed in puncture to prevent accidental tissue injury.

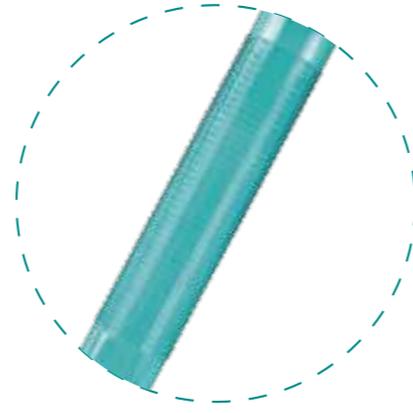

02 Bladeless obturator

Separates, instead of cuts, reducing risk of abdominal wall injuries with bleeding complications.

03 Diamond tip

Facilitate smoother insertion for easier trocar placement.

04 Reverse thread design

Make the insertion smoothly and prevent the undesired movement in the operation.

05 Removable sealing cover

The sealing cap is detachable to facilitate tissue removal during surgery.

06 Double-layer valve

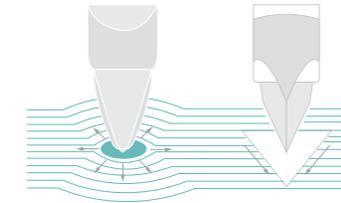

The puncture cannula has better air tightness.

Double valve design

Laparoscopic trocar

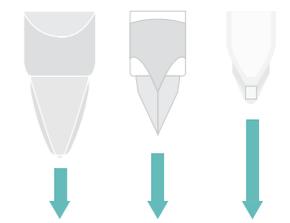

Blade trocar

Minimally invasive

DISPOSABLE INCISION PROTECTION SLEEVE

Product Description

The product series include Polymer IPS-A series and Silicone IPS-B series. Polymer IPS-A series are made of polymer, height-adjusted. Silicone IPS-B series are made of silicone material height-fixed.

Application

Polymer IPS-A series are applicable to general surgery, G&A surgery, laparotomy and other open surgeries with large incision.

Silicone IPS-B series apply to thoracoscopic surgery, suspended laparoscopic surgery and other surgeries with small incision.

Product Advantages

01 Retraction

Provide 360° circumferential elastic retraction during procedures and evenly distribute retraction to minimize wounds and pains.

02 Protection

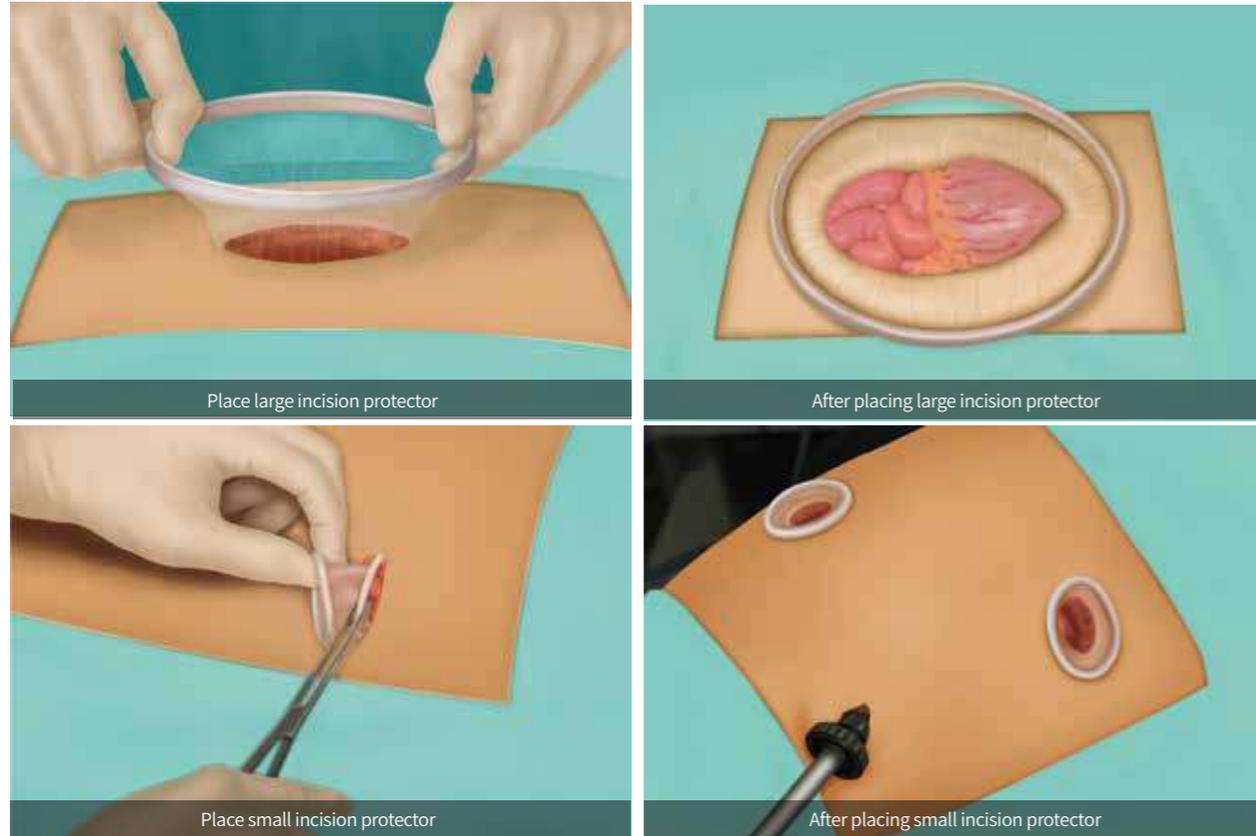

Protect wounds at the incision site with superior material strength, significantly avoid infection and keep incision moist.

03 Exposure

Minimize the working field for better exposure and visualization, prevent bleeding implications and free up surgeons' hands.

SURGERY RETRACTOR SYSTEM

Product Description

The retractor system operates manually with self-locking function. It consists of a retractor ring, movable screws and retractor hooks.

Applications

Apply to temporarily separate tissues or anatomical structures to increase exposure of internal tissue or organ in surgical field.

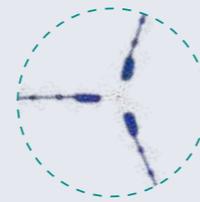

01 Simple to use
Only three steps to finish.

02 Meet various surgical demands

03 Self-retention design
Free up surgeons' hands.

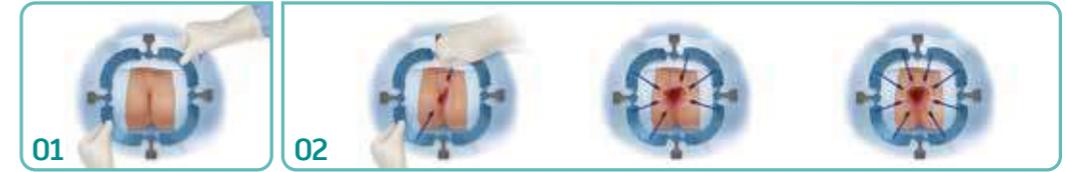

04 The marble hook can be more effectively fixed, prompting and not easy to slide.

Product Model

01 Retractor ring

02 Retractor hook

Application Departments

01 WZRR-A-B applical to otolaryngology surgery.

02 WZRR-A-C applical to thyroid, breast, plastic surgery.

03 WZRR-A-D applical to anorectal, rectal, general, gynecology.

04 WARR-A-F applical to thyroid, urology surgery.

05 WZRR-A-H applical to gynecology, urology surgery.

DISPOSABLE SAMPLE RETRIEVAL BAG

Product Advantages

01 Detachable handle
Convenient to separate the handle and rod and ergonomically designed handle makes it comfortable for pushing and pulling.

02 Material
The TPU material bag is soft and transparent. Ni-Ti metallic rim enables bag to open automatically, quickly and completely.

03 Retrieval bag
The retrieval bag can be opened automatically, quickly and completely and it also can be opened closed repeatedly.

Applications

Procedural Applications Facilitates a wide range of laparoscopic procedures: Cholecystectomy, Oophorectomy, Appendectomy, Nephrectomy, Splenectomy, Sleeve, Gastrectomy.

*OEM services are available.

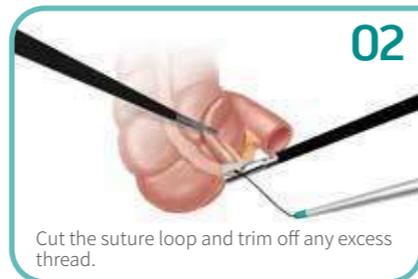

DISPOSABLE LIGATION LOOP

Applications

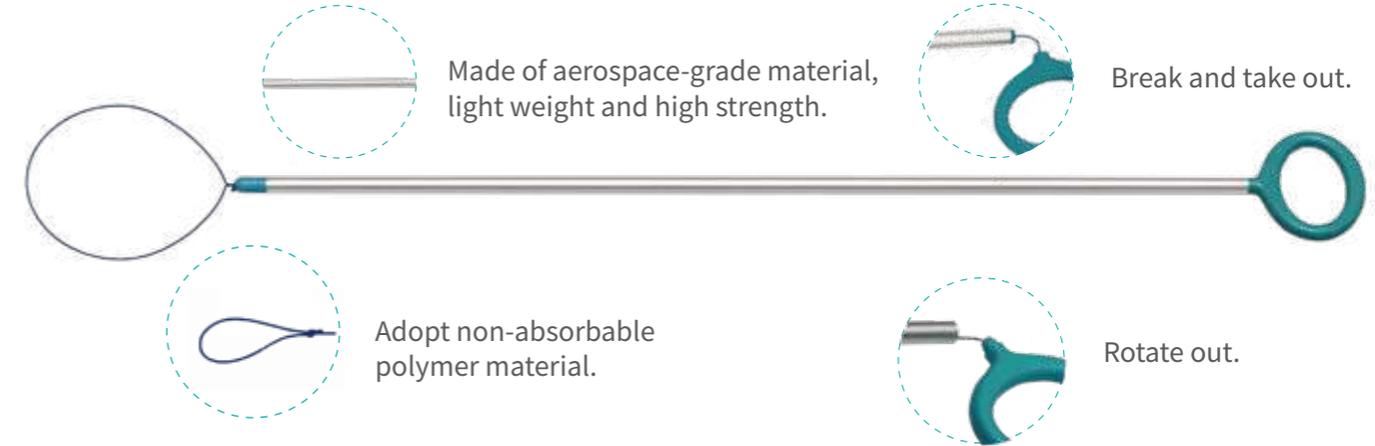

It is suitable for ligation of lumen-like tissues (such as appendix, uterine fibroids, etc.) in various endoscopic operations.

Operating Procedures

Product Advantages

01 Handle with two types of usage
unscrew or break off directly.

02 Connecting rod
made of aluminium alloy with high strength and lower weight.

03 Ligature
the non-absorbable surgical suture has steady physicochemical properties which decreases the risk of infection.

Report Number: QIP-AS12041781
Audit Date: 29 Dec 2020

This report is issued by Focus Technology Co., Ltd. (Made-in-China.com) and the supervising inspectors (SGS-CSTC Standards Technical Services Co., Ltd.) to confirm that:

Company Name: Microcure (Suzhou) Medical Technology Co., Ltd.
微至 (苏州) 医疗科技有限公司
Showeroom: <http://www.microcure.com>
Address: Building 1-101, No. 188, Jialiang Road, New District, Suzhou, Jiangsu, China
Product: Surgical Stapler, Disposable Trocar, Sample Retrieval Bag, Ligation Loop, Surgery Retractor, Wound Protector

has been on site audited for the Following Scope of Activity:

1. General Information
2. Foreign Trade Capacity
3. Product Research & Development Capacity
4. Management System and Product Certification
5. Production Capacity & Quality Control
6. Working Environment
7. Energy Saving and Emission Reduction
8. Others

General Comments:
Microcure (Suzhou) Medical Technology Co., Ltd. is a manufacturer with 45 employees, it was established in 2015, located in Building 1-101, No. 188, Jialiang Road, New District, Suzhou, Jiangsu, China. The company occupies an area of about 2,400 square meters, they have passed ISO13485:2015 certification, and obtained CE certificates. Microcure (Suzhou) Medical Technology Co., Ltd. has successful foreign trading experience in North America, South America, Europe, Southeast Asia, Midwest, Africa.
