

# Vetus 7

## Veterinary Ultrasound System

# Precision and Portability

The Vetus 7 Veterinary Ultrasound System is a comprehensive solution that caters to a wide variety of animal species ranging from small companion to large animals and everything in between. The Vetus 7 encompasses cutting-edge technology to provide clear and precise diagnostic images. With a small footprint and dedicated smart workflow protocols, this System is the ideal diagnostic tool for your practice.

## Designed specifically for veterinarians

- Dedicated presets based on animal type and size for customized workflows and precise diagnoses
- Ability to quickly select or change transducers or exam types from the same touchscreen, reducing exam times
- Efficient workflow protocols display the last four exam types for easy access

## Powerful and intelligent tools

- Auto Volume Control System controls the Doppler signal audio to reduce the chance of frightening the animals
- Auto measure tools, such as Auto Pulsed Wave mode (Auto PW) and Auto Ejection Fraction (Auto EF), help maximize productivity and enable easy and accurate scanning
- **iWorks™ Protocol** is a protocol-based feature that helps standardize workflow and reduce exam times
- **iTouch™** automatically optimizes image quality with one-click
